DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 43-49 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 46-51 of U.S. Patent No. 6,685,711 in view of Kienzle, III et al. (US 6,285,902).

Claims 50-63 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 58-63 of U.S. Patent No. 6,685,711 in view of Kienzle, III et al. (US 6,285,902).

Claims 64-73 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 64-72 of U.S. Patent No. 6,685,711 in view of Kienzle, III et al. (US 6,285,902) or "Kienzle herein".

The various patented claims disclose all elements of the claimed invention except for an explicit reference to: (1) a computer navigation system coupled to the

resection guide; and/or (2) a computer navigation tracker coupled to the resection guide.

Kienzle teaches an image-guided surgical system wherein a computer is used to guide a surgical tool to a desired position. Kienzle also teaches the use of localizing emitters or "trackers" attached to the tool for accurately guiding the tool using a computer navigation system to a desired location within the body (Figs. 8A-8B12, col. 6, lines 48-58, col. 7, lines 57-67 and col. 8, lines 1-11).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have attached localizing emitters or trackers to the resection guide of the patented claims to enable guiding of the tool utilizing a computer navigation system, as taught by Kienzle, since it was well known in the art to attach emitters or trackers to a tool, to enable precision guiding of the tool with a computer navigation system.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
